Living Systems

A home that you live in; spaces that accompany the passing hours and changing light. A home that is not necessarily large but is filled with situations, potential and different spaces. A modern home made of spaces not walls. A home designed to be transformed without losing its balance and harmony. A home that is not always the same but is like us and knows our moods. One that opens up when we want friends around us and becomes cosy and private when we want to be alone to read or work. Living in the home and adjusting the depth of your gaze with a gesture, shaping it to match our emotions.

Una casa da vivere, spazi che accompagnano il ritmo delle ore e il mutare delle luci. Una casa che non ha bisogno di essere grande per essere ricca di situazioni, di possibilità e di ambienti diversi. Una casa moderna, fatta di spazi e non di muri. Una casa pensata per potersi trasformare senza perdere l'equilibrio e l'armonia. Non una casa sempre uguale, ma una casa che ci assomiglia e conosce i nostri umori, che sa aprirsi quando abbiamo voglia di tanti amici per diventare intima e raccolta se vogliamo stare soli a leggere o lavorare. Abitare lo spazio della casa, modulare con un gesto la profondità dello sguardo per dargli la forma delle nostre emozioni.

Space Spazio

Spaces for storage and leisure mixed with exclusively techno contemporary elements.

Spazi dedicati all'archiviazione e al tempo libero, si mixano con elementi dal carattere prettamente tecnologico e contemporaneo.

Technology Tecnologia

Each component is the result of careful technological research that enhances the quality and durability of the products.

Ogni componente è frutto di un'attenta ricerca tecnologica che eleva la qualità e la durabilità dei prodotti.

Creativity Creatività

A wide range of configurations and infinite customisation options to satisfy even the most demanding and creative of clients.

Un'ampia gamma di configurazioni e gradi di personalizzazione infiniti, per soddisfare anche i clienti più esigenti e creativi.

Customisation Personalizzazione

Reductions, cutting and tailoring to the centimetre are all possible, to fit every wall and corner in the home.

Possibilità di riduzioni, tagli e personalizzazione al centimetro, per adattarsi ad ogni parete e angolo della casa.

505 UP - System

Nicola Gallizia

The Collection represents the heart of contemporary living needs, where domestic spaces are versatile, multifunctional, and can be adapted and modelled according to use. This is the common thread that has led to the total reinterpretation of one of the company's icons, the 505 system, which has found its upgrade in the 505 UP - System.

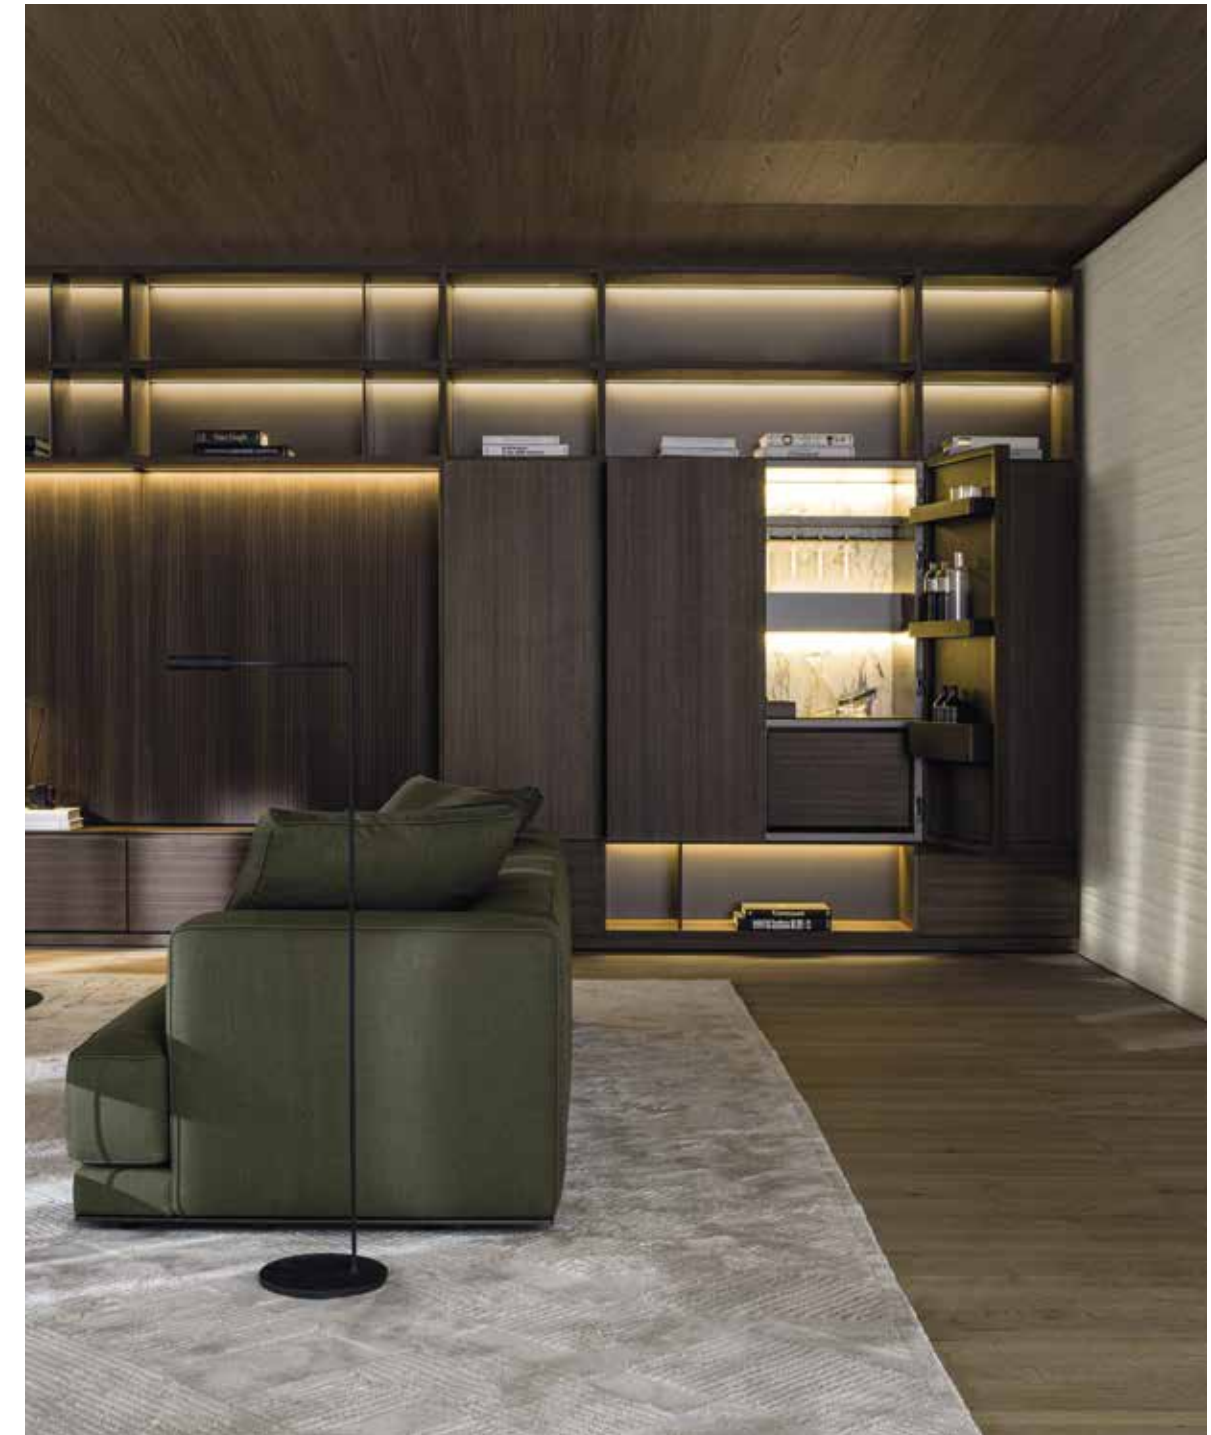

La Collezione rappresenta il cuore delle esigenze dell'abitare contemporaneo, dove gli spazi domestici sono versatili, multifunzionali, capaci di adattarsi e modellarsi a seconda dell'uso. Questo è il filo conduttore che ha portato alla rivisitazione totale di una delle icone dell'azienda, il sistema 505, trova il suo upgrade in 505 UP - System.

Modulo Harry's Bar

Il modulo Harry's è stato pensato come elemento totalmente autonomo, ma inserito in sospensione nel sistema 505. Due grandi ante, scatolate o vetrate con apertura totale a 180° tramite una cerniera a scomparsa, danno accesso al vano interno, dai preziosi rivestimenti in legno, ceramica o ecoskin, progettato per ospitare e conservare al meglio utensili e bottiglie per ogni tipo di bevanda.

Harry's bar module

505 UP Harry's bar has been designed as a totally autonomous element, but totally included in suspension in the 505 system. Two large doors, box-shaped or glazed with a full 180° opening thanks to a concealed hinge, give access to the internal compartment, with fine wooden, ceramic or ecoskin covering, designed to house and conserve tools and bottles for any type of drink.

505 UP - SYSTEM

505 UP - Sideboard

Nicola Gallizia

505 UP - Sideboard is the natural evolution of 505 UP in its process of simplification and interpretation of contemporary living requirements. A sideboard with a thousand nuances, like the many variants and combinations of its front pieces. As versatile and functional as 505 UP - System but with dedicated depth and a dual option for the base: floor standing plinth, or metal base for a lighter and more aerial version.

505 UP - Sideboard rappresenta la naturale evoluzione di 505 UP nel suo percorso di semplificazione ed interpretazione delle esigenze dell'abitare contemporaneo. Una madia dai mille volti, proprio come le innumerevoli varianti e combinazioni delle sue facciate. Versatile e funzionale come 505 UP - System ma con una profondità dedicata e una doppia opzione per il basamento: a terra con zoccolo, oppure basamento metallico per una versione più leggera ed aerea.

Pass-Word Evolution

Dante Bonuccelli

Pass-Word Evolution is the system designed for contemporary rooms to meet the needs generated by the innovative use of domestic spaces. The hanging display case is extended by introducing a new compositional possibility: a glass horizontal solution with profiled metal finishes, together with the possibility of adding a mirror and LED lighting on the back panel. The special feature is the innovative and patented flap door opening, without any mechanism. The range of available compositions has been renewed by extending the two widths to 940 and 1100. The single shelf features a monochromatic solution with metal finishes with led lighting above and below, reinterpreting a new way of covering walls with formal rigour.

Pass-Word Evolution è il sistema disegnato per ambienti contemporanei che risponde ai nuovi utilizzi degli spazi domestici. La vetrina appesa si amplia inserendo una nuova possibilità compositiva: una soluzione orizzontale in vetro profilata nelle finiture metalliche, insieme alla possibilità di inserire lo specchio e il Led nello schienale. La particolarità risiede nella innovativa e brevettata apertura a ribalta dell'anta, priva di alcun meccanismo. La gamma di composizioni si rinnova ampliando le due larghezze di 940 e 1100. La mensola singola si avvale di una soluzione monocromatica in finiture metalliche dotata di illuminazione led sopra e sotto, per reinterpretare un nuovo modo di rivestire la parete nel rigore formale.

Hector

Vincent Van Duysen

With his Hector project, Vincent Van Duysen makes his debut in the world of upright modular bookcases, designed to achieve light and airy compositions, of any length and as tall as you like, thanks to the modular elements of which they are composed, making the most of the features of the upright fixed between the floor and the ceiling. Hector can be placed anywhere in the room, along the wall or in the centre, thereby providing a partition suitable for subdividing the living areas, set aside for relaxation, thanks also to the steerable TV stand, from dining areas dedicated to socializing.

Vincent Van Duysen con il progetto Hector si affaccia al mondo delle librerie componibili a montante, che permettono di realizzare composizioni molto aeree, di qualsiasi lunghezza e alte a piacere, grazie agli elementi modulari che la compongono, sfruttando le caratteristiche del montante fissato tra pavimento e soffitto o a parete. Hector può essere posizionato ovunque nella stanza; lungo la parete o al centro dando vita ad un elemento divisorio adatto a suddividere aree living, dedicate al relax, grazie anche al supporto TV orientabile, da aree dining dedicate alla convivialità.

Grid

Vincent Van Duysen

Grid, designed by Vincent Van Duysen, represents a new research chapter in the world of modular wall-systems. A research on the evolution of the domestic landscape, a transversal, open and flexible system, based on a modular grid that organizes the elements of the composition and exalts their function. A system of wall-mounted panels, made with the folding technique, which can be equipped, on request, with LED lighting bars inserted in the central band and in the upper rim. Grid is designed to accommodate all the modern electronic devices and hi-tech equipment for sound and image that amplify the perception of space.

Grid, design Vincent Van Duysen, costituisce un nuovo capitolo di ricerca nell'ambito dei sistemi componibili. Una ricerca sull'evoluzione dello spazio domestico, un sistema trasversale, aperto e flessibile, che si articola sulla base di una griglia modulare che organizza gli elementi della composizione e ne esalta la funzione. Un sistema di pannellature realizzate a folding e corredate, a richiesta, di barre di illuminazione a LED inserite nella fascia centrale e nella parte superiore. Grid è progettato per accogliere i più moderni dispositivi elettronici e apparecchiature tecnologiche legate a suoni ed immagini che estendono la percezione dello spazio.

Grid-Up

Vincent Van Duysen

The Pass-Word Evolution system is enriched by Grid-Up, a wall unit designed by Vincent Van Duysen that can be either open or closed, with doors and side panels in extraclear transparent glass and transparent stopsol. The pewter or iris profiles enhance the module's design, which is equipped with a new system of directional spotlights on the inside. Finishes include the entire range of matt lacquers, eucalyptus, sunrise oak, graphite oak as well as coffee oak. This element, which can be attached directly to the wall, creates a surprising dynamic effect.

Il sistema Pass-Word Evolution si arricchisce con Grid-Up, un elemento pensile disegnato da Vincent Van Duysen che può essere sia a giorno che chiuso con ante e spalle laterali in vetro trasparente extra chiaro e stopsol trasparente. I profili in peltro o in iris, delineano il design del modulo, accessorato al suo interno con un nuovo sistema di faretti direzionabili. Le finiture comprendono tutta la gamma dei laccati opachi, le essenze eucalipto e rovere sunrise, il rovere grafite oltre che il rovere caffè. Questo elemento, che può essere aganciato direttamente a parete, crea un effetto dinamico sorprendente.
