MATERIALS

FRAME + SEAT

COATED ALUMINIUM

Aluminium is a non-ferrous metal, which combines great mechanical rigidity with light weight; this makes it especially suitable for making furniture. If treated correctly it has a good resistance to corrosion. One of the treatments is powder coating. After a chemical pre-treatment an epoxy powder is applied statically and baked.

COATED ALUMINIUM - BRONZE

BACK

OLEFIN FIBRE

Olefin fibre is a synthetic fibre made from polyethylene. The advantage of this fibre is its strength, colour fastness and comfort. Also it is very resistant to staining and different weather conditions.

OLEFIN FIBRE
