# Frame Collection

IT

La rete di poliestere spalmata con PVC, nelle sue tante varianti cromatiche, su struttura in profilo d'alluminio estruso ed elementi in pressofusione verniciati è l'elemento comune dei prodotti dell'insieme *frame*. Declinata in tipologie tutte diversamente pensate per combinare comfort e funzione, la collezione *frame* è un progetto di grande successo diventato negli anni icona di riferimento per altre produzioni.

DE

Das PVC-beschichtete Polyesternetz mit seinen vielen Farben und das lackierte Gestelle aus fließgepresstem Aluminium und Aluminiumdruckgusselementen sind die charakteristischen Element der Serie *frame*. Diese präsentiert sich in ganz unterschiedlich durchdachten Varianten um Komfort und Funktion harmonisch zu kombinieren. Eine erfolgreiche Kollektion, die im Laufe der Jahre auch Anhaltspunkt für andere Projekte gewesen ist.

EN

The *frame collection* is characterised by PVC covered polyester mesh available in many colour variants, with a structure in extruded aluminium and stove enamelled die casting components. Comprised of an array of products, each designed differently to combine comfort and function, *frame* is a successful collection which has become over the years an icon for other collections.

FR

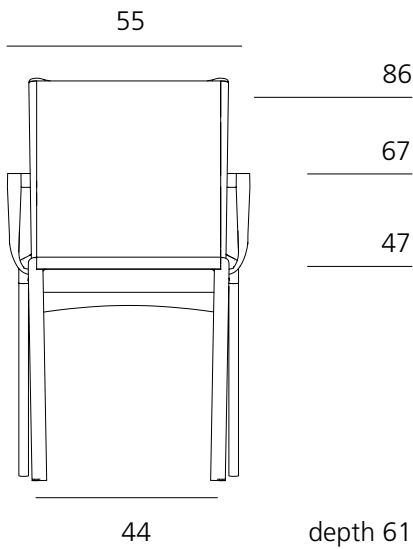

Le tissu maillé en polyester enduit de PVC, avec ses nombreuses variantes chromatiques, sur une structure en profil d'aluminium extrudé et éléments en fonte d'aluminium laqué est l'élément commun des produits de la gamme *frame*. Déclinée dans des typologies différentes mais qui allient toutes confort et fonction, la collection *frame* est un projet de grand succès qui est devenu au cours des années une icône de référence pour d'autres productions.

is available with or without  
armrests.*

*Die highframe stapelbare  
Stühle sind mit oder ohne  
Armlehnen.*

*Les chaises empilables  
highframe sont disponibles  
avec ou sans accoudoirs.*

## FRAME STOOL

frame stool

frame high stool

Un significativo ampliamento nel catalogo Alias, grazie all'introduzione dei nuovi sgabelli all'interno della collezione frame. Proposti nella variante fissa, questi sgabelli raccontano il futuro del lavoro e la necessità di elementi ibridi che possano svolgere più funzioni.

Perfettamente coerenti con il progetto highframe, che dal 1994 continua a rappresentare uno dei grandi successi di Alias, questi sgabelli sono proposti con altezza seduta di 65 o 80 centimetri, grazie alle quattro gambe in alluminio estruso, che rappresentano il prolungamento naturale della struttura della sedia.

The Alias furniture line-up is greatly enriched with the introduction of new stools for its frame collection. Proposed in a fixed version, these stools illustrate the future of the working environment and the need for hybrid elements that can serve different purposes. Perfectly in line with the highframe project, which, since 1994, has been one of Alias's main successes, these fixed stools proposed in 65 and 80 cm high seat versions feature four legs in extruded aluminium that are a natural extension of the seat structure.

Eine signifikante Erweiterung des Katalogs von Alias durch die neuen Hocker der Kollektion frame. Die Hocker werden feststehend angeboten und zeigen die Zukunft des Arbeitens und die Notwendigkeit hybrider Elemente, die mehrere Funktionen erfüllen. Diese Hocker mit Sitzhöhen 65 und 80 Zentimetern sind dank der vier Beine aus Strangpressaluminium, die eine natürlich Verlängerung der Stuhlstruktur bilden, perfekt kohärent mit dem Projekt highframe, das seit 1994 eines der erfolgreichsten Produkte von Alias ist.

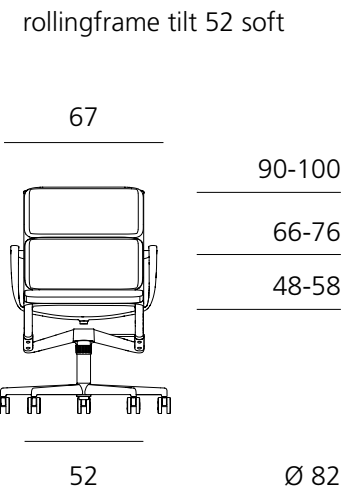

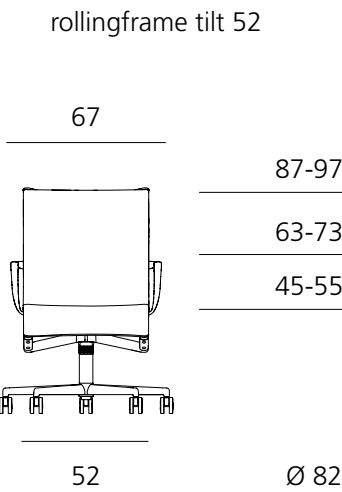

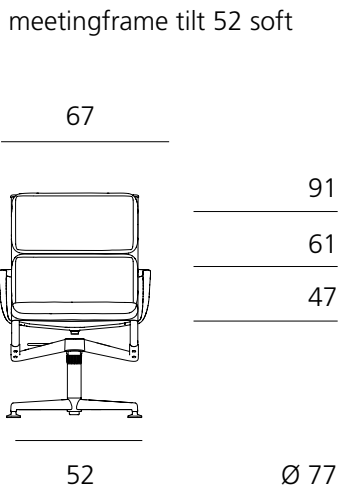

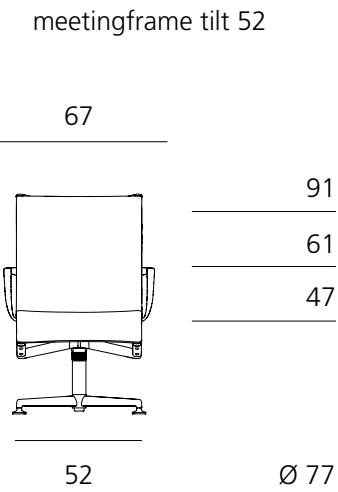

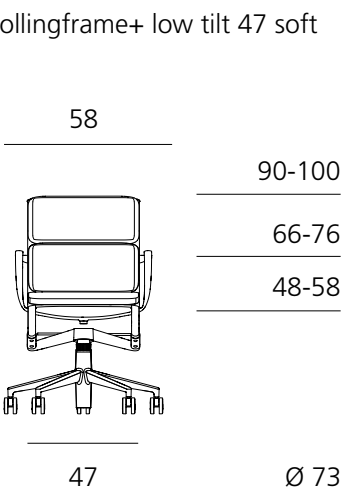

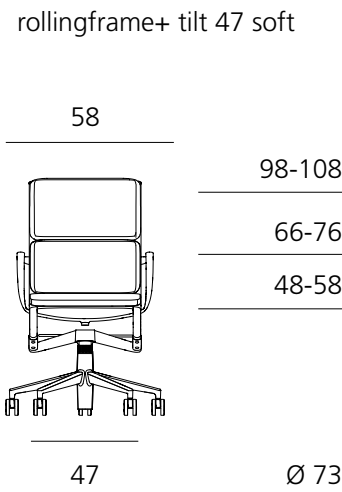

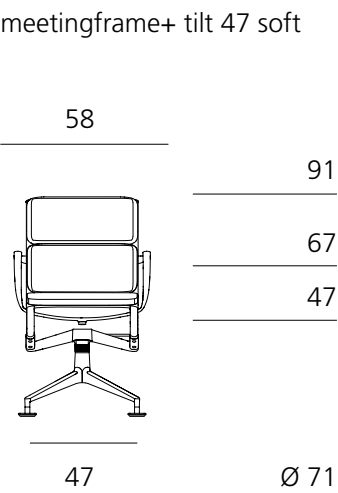

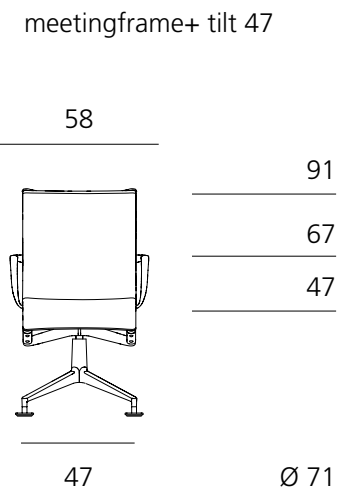

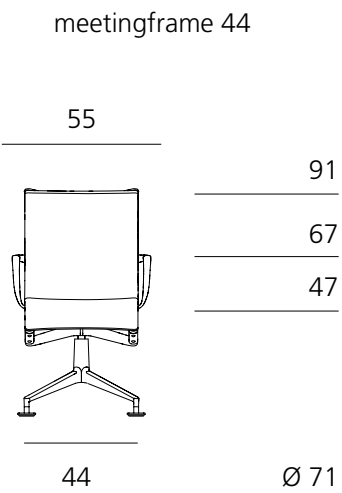

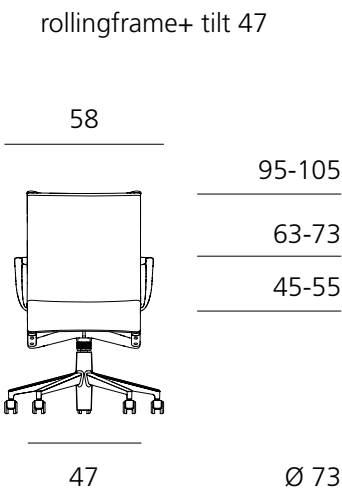

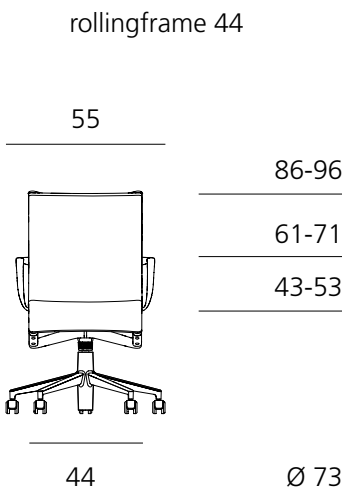

Le catalogue Alias s'enrichit des nouveaux tabourets de la collection frame. Proposés dans la variante fixe, ces tabourets racontent le futur du travail et la nécessité d'éléments hybrides capables d'assurer plusieurs fonctions. Parfaitement cohérents avec le projet highframe qui, depuis 1994, continue à représenter un des quatre grands succès d'Alias, ces tabourets sont proposés dans les hauteurs d'assise de 65 et 80 centimètres, grâce aux quatre jambes en aluminium extrudé qui représentent le prolongement naturel de la structure de la chaise.

*Les chaises rollingframe tilt 52 avec accoudoirs en polyuréthane sont conformes à la norme UNI 1335C en matière de principes ergonomiques et de critères fonctionnels minimum des chaises de bureau.*

FRAME TILT

Il tilt aumenta il comfort di rollingframe+ e meetingframe+, rendendo possibile l’inclinazione contemporanea della seduta con lo schienale.  
A seconda del peso dell’utente è possibile regolare la durezza della molla che governa il meccanismo oscillante.

The tilting action enhances the degree of comfort provided by rollingframe+ and meetingframe+ chairs, since the angles of inclination of the seat and back can be adjusted simultaneously. The hardness of the spring that controls the tilting mechanism can be adjusted as a function of user weight.

Tilt erhöht den Komfort von rollingframe+ und meetingframe+ und ermöglicht die gleichzeitige Schrägstellung von Sitzfläche und Rückenlehne. Je nach Gewicht des Nutzers kann die Härte der Feder des Kippmechanismus eingestellt werden.

Le tilt améliore le confort de rollingframe+ et de meetingframe+ en permettant d’incliner l’assise en même temps que le dossier. Selon son poids, l’usager module la dureté du ressort qui règle le mécanisme d’oscillation.

La finitura della rete "colors" è sempre in tinta al colore della struttura in alluminio verniciato.

The color of the stove enamelled aluminim structure has to be combined with the same mesh color.

Das lackierte Gestell ist immer mit dem Netz in der gleichen Farbe kombinierbar oder mit weißem Netzgewebe (R009).

La couleur de la structure en aluminium laqué est toujours accouplée à la finition du tissu maillé.
